Delivery Engineering Manager, Project / Program Management, Product Management

May 2011 - March 2014 (2 years 11 months)

Vietnam

Managed 2 project teams of around 60 members (which was initially with just 5 at the beginning) being responsible for delivering all software development, data analysis and normalization outsourced services to the company's key account of MEPERIA (www.meperia.com) in offering the Best-in-KLAS solutions for mastering hospital supply spend through the McKesson Strategic Supply Sourcing application (<http://www.mckesson.com/providers/health-systems/department-solutions/supply-chain-solutions/mckesson-strategic-supply-sourcing/>).

Participated in all internal and external project oriented and operation activities including building resources, developing and training teams, analyzing and developing product requirements, setting and providing technical directions / solutions, performing technical review, engaging and consulting the clients, communicating / reporting to the relevant stakeholders all aspects of finance, customer, process, learning and growth related to this key account management as well as to the future potential of strategic growth of the company...

Project Manager

September 2010 - April 2011 (8 months)

Managed a team of 7 members to focus on developing and maintaining Java related products (web applications, web sites...) of the company and other external customers (e.g. www.ebuilding.vn, www.meperia.com, www.namthienloc.vn, www.ifa.edu.vn,...). Another goal of the project is to seek for new potential projects / customers that rely on Java related technologies.

Project Manager

March 2010 - September 2010 (7 months)

As Project Manager of Catalyst project (GHX client - www.ghx.com), I managed a project team of 10 people to develop and maintain GHX's

Procurement Suite solution is to help healthcare providers (e.g. hospitals) save their return on medical-surgical spend. Leveraging the industry's most accurate content management platform from GHX, contract optimization capabilities and connectivity to manufacturers and distributors, the Procurement Suite solution provides a foundation of accurate data with an easy-to-use interface designed to create visibility to procurement occurring outside of materials management system (e.g. ERP system)...

Project Manager

March 2009 - March 2010 (1 year 1 month)

As Project Manager of NuVia3 project (GHX client - www.ghx.com), I managed a team of 8 full time resources with the following responsibilities,

- Managing all the project's aspects: scope, time, cost, quality...
- Working with customer about the scope of the project (collecting and clarifying requirements) as well as the schedules
- Monitoring and controlling the work progress of the team
- Reporting the project status to the customer as well as to the higher management

Technical Lead

August 2006 - March 2009 (2 years 8 months)

Worked as Technical Lead on NuVia2 project (for GHX client - www.ghx.com) with below responsibilities,

- Leading a team of 9 LISP developers being responsible for developing the back-end of NuVia2 application,
- Researching the new technologies: programming with Common LISP,
- Training the developers with new technologies: Common LISP, AllegroCache...,
- Working with Project Manager on the collected requirements,
- Designing the architecture for the application,
- Implementing the core architecture of the application,
- Assigning and reviewing the tasks of the developers,
- Monitoring and controlling the work of the developers,
- Reporting the work status of the development team to the Project Manager.

NETiKA Business Solution Vietnam

Senior Software Developer

May 2006 - July 2006 (3 months)

Worked as a senior developer on .NET framework, Javascript, MS SQL Server, Flash Actionscript...
