## EDUCATION

**Udacity.com**                                                            *December 2018 - Present*
Graduated Data Analyst Nanodegree
**Hochiminh University of Technology, Vietnam**                                    *2009 - 2014*
Bachelor of Industrial System of Engineering, Mechanic.

## CAREER OBJECTIVE

To work for an organization which provides me the opportunity to improve my skills, knowledge to grow along with the organization objective and I can contribute to its growth.

## PROJECTS

**Exploring Weather Trends**
The project analyzes local and global temperature data and compare the temperature trends where you live to overall global temperature trends..
Details: Extract the city and global data from the database by writing a SQL query. Export to CSV. Create a line chart and make observations.

**Investigate a Dataset**
The European Soccer Analysts from several European countries from 2008 to 2016, which analyzes a dataset and then communicate findings about it by using Python libraries NumPy, pandas, and Matplotlib.

**Analyze A/B Test Results**
Worked to understand the results of an A/B test run by an e-commerce website. My goal was to help the company understand if they should implement the new page, keep the old page, or perhaps run the experiment longer to make their decision (Logistic Regression).

**Data Wrangling**
This project was part of the data wrangling section of the Udacity Data Analyst Nanodegree program and is primarily focused on wrangling data from the WeRateDogs Twitter account using Python (pandas, numpy, requests, tweepy, json), documented in a Jupyter Notebook

**Data Visualization**
Explored the Ford GoBike System Data and performed an exploratory data using Python (numby, pandas, matplotlib, seaborn). Then create a presentation with explanatory plots that convey findings.
