## SUMMARY

---

- I have about 3 years of work experience in software testing.
- I am able to execute both manual testing and automation testing.
- I have experience in API testing and SQL
- I am familiar with projects using Agile/Scrum working process.
- I am striving to become a senior QC with solid skills in different types of tests, manage time and tasks well, get the job done fast and efficiently.

## WORK EXPERIENCE

---

**Vinova Pte. Ltd**  
**Manual Tester**

**08/2022 - 05/2023**

### Responsibilities:

- Test and verify CMS, Website & Mobile App to ensure that they meet the required specifications and standards and to identify and report any defects or issues.
- I coordinate with the DEV team to implement the project based on Agile/Scrum using Jira.

### Technologies:

Manual testing, API testing, PostgreSQL

### Project: Gofix

#### Description:

Gofix is the partner for property services such as household repairs and maintenance works, lifts, and needs for homeowners, SMEs, and commercial offices.

Gofix has been launched for more than 4 years. There are 2 CMS websites and 3 Mobile apps.

### Project: Tribe

#### Description:

A non-nancial services platform that turns SMEs into a thriving & connected financial community.

**Responsibilities**

**Automation-QC of Consensus team:**

- Write test case, write test script by Python & Pytest, organize and design the script based on OOP, and call RPC to verify.
- Use Jenkins to deploy the local chain, and create environment testing.
- Ssh server, use the command line to run nodes for staking, and check the lifecycle of a validator.
- Testing consensus mechanism & dynamic committee size.
- Regression test by test script features transactions, pdex, portal, staking, ... when launching a new consensus feature.

**Manual-QC of Bridge team:**

- Use MySQL Workbench and Postman tools to test the Backend.
- Use the Proxyman tool to test Mobile App (iOS).

**Technologies:**

- Python & Pytest, OOP, RegEx, Postman, Jenkins, Proxyman, MySQL.

**Project:** Incognito chain

**Description:**

Incognito mode for crypto networks based on Blockchain technology.

**Responsibilities**

- I coordinate with the DEV team to implement the project based on Agile/Scrum using Redmine.
- Create the test checklist and execute manual testing. Log bug tickets and suggestions on the Redmine tool. Tracking, verifying & closing tickets.
