+ Perform performance, exploration , regression , function, component, system, integration, stress, smoke, sanity testing.

+ Test logs, database , UXX, API, Security , Function website, Application.

+ Test web service , APIs, Response, Request by using SOAPUI, Jmeter.

+ Report all bugs found in Jira, Redmine bug base.

+ Perform Bug follow-up until the bug is completely fixed by developers.

Projects which I joined:

+ Mobile Software/Application: Talk life, Deal hit.

- o Test
- o Gym
- o Music
- o Photographer

+ Website and Mobile platform: Trusted Integration ODC , SALT , MARS, TEST CODE FILE MAINTENANCE, DTS.

+ Mobile Game, Android TV Game, Set-top box.

+ Tools test : CRM, Tracking server, tuna , android checklist, user manager, Webmail, DDMS, Jmeter, Agile, Jira, Redmine, Maven, Appium, Selenium.

JUL 2011 + **DETAIL OF JOINED PROJECTS**

↓
Today

1. Enerd:

+ Summary: Coaching and Studying Online Website .
+ Responsibility: investigate business. create test plan, test case , perform overview testing, report, follow up testing, testers
+ Tools: Redmine, Selenium
+ Technology: Wordpress , PHP
+ Platform: Website (IE, Chrome, Safari, Firefox)

2. Icos:

+ Summary: Delivery goods and payment website .
+ Responsibility: investigate business, test case , perform overview testing, report, follow up testing, testers.
+ Tools: Redmine
+ Technology: PHP
+ Platform: Website (IE, Chrome, Safari, Firefox) and Mobile platform (IOS, Android, WP);

3. Poshberry:

+ Summary: booking air ticket website (Wordpress)
+ Responsibility: investigate business. create test plan, test case , perform overview testing, report, follow up testing, testers.
+ Tools: Redmine, Jmeter, Selenium
+ Technology: PHP, Selenium
+ Platform: Website (IE, Chrome, Safari, Firefox) and Mobile platform (IOS, Android, WP);

4. Vericle:

+ Summary: store of online medicine, support buying medicine
+ Responsibility: investigate business. create test plan, test case , perform overview testing, report, follow up testing, testers.
+ Tools: Redmine, SoapUI, Selenium
+ Technology: PHP, Wordpress .
+ Platform: Website (IE, Chrome, Safari, Firefox)

5. Duelfoot:

+ Summary: Game of IOS device about football and questions.
+ Responsibility: Analyze project and tested API is the main case.
+ Tools: Redmine, SoapUI
+ Technology: API, Web service
+ Platform: IOS MOBILE

6. DTS - Portal :

+ Summary: the big sound system for cinema, mobile, phone, house

- + Responsibility: work both on Automation testing and Manual testing and Daily meeting and contact directly with foreign customers.
- + Tools: Agile, Scrum , jira.
- + Technology: JAVA, Web service
- + Platform: on website (IE, Chrome,Safari,Firefox).

JUL 2011 + DETAIL OF JOINED PROJECTS - CONTINUOUS

↓
Today

7. Trusted Integration ODC:

- + Summary: this is a Health Care and generation website to store important documents and review , input/edit content documents of a lot of Organizations.
- + Responsibility: investigate business. create test plan, test case , perform overview testing, report, follow up testing,testers.
- + Tools: Redmine
- + Technology: HTML
- + Platform: website IE, Chrome,Safari,Firefox.

8. Cavod:

- + Summary: Personalized quality support for old persons Cavod is the fastest and easiest to find an auxiliary living trust.
- + Responsibility: investigate business. create test plan, test case , perform overview testing, report, follow up testing,testers.
- + Tools: Redmine , jmeter
- + Technology: PHP, wordpress
- + Platform: Website (IE, Chrome,Safari,Firefox)

9. Apolo:

- + Summary: Create event, meeting online website
- + Responsibility: investigate business. create test plan, test case , perform overview testing, report, follow up testing,testers.
- + Tools: Redmine , selenium
- + Technology: PHP, wordpress
- + Platform: Website (IE, Chrome,Safari,Firefox) and Mobile (IOS, Android).

10. Balux:

- + Summary:Shop, Ship, Management Store project
- + Responsibility: Perform testing both manual and automation
- + Tools: Redmine, Selenium, Jmeter
- + Technology: Wordpress
- + Platform: Website (IE, Chrome,Safari,Firefox) and Mobile (IOS, Android).

11. EMS:

- + Summary: Health Care project with import,export from database
- + Responsibility: Test leader, key tester
- + Tools: Redmine, Mantis, SoapUI
- + Technology: PHP
- + Platform: Website (IE, Chrome,Safari,Firefox) and Mobile (IOS, Android).

JUL 2011 + DETAIL OF JOINED PROJECTS - CONTINUOUS

↓
Today

12. SALT project :

- + Summary: this is lottery application for staff of a big company.
- + Responsibility: create test case , perform testing, report, follow up issues.
- + Tools: Jira
- + Technology: Mobile testing
- + Platform: Mobile platform (IOS, Android, WP);

13. MARS and XIFIN Portal Project

- + Summary: this is a big health care system building in many platform Website and prepare to build in Mobile.
- + Responsibility: investigate business. create test case , perform overview testing, report, follow up issues.
- + Tools: JIRA
- + Technology: JAVA
- + Platform: website IE, Chrome,Safari,Firefox.

14. Mobile Game: Real Soccer 2013, Real Football 2013, The Amazing Spider man, Batman The Dark Knight Rise, Little Pony, Iron Man 3, N.O.V.A 3, Wonder Zoo, Zoo Rescue+ Order & Chaos Duels, Asphalt 7,Brother in arm.

- + Responsibility: Tester and supervisor projects
- + Tools: CRM, Tracking server, tuna , android checklist, user manager, Webmail, DDMS
- + Technology: Mobile testing
- + Platform: Mobile (IOS, Android).

15. Set-top-box game: Ice Age TV, Modern Combat 4 TV, Asphalt 8 TV, World at arms TV, Heroes of Order & Chaos, Order & Chaos TV.

- + Responsibility: Tester and supervisor projects
- + Tools: CRM, Tracking server, tuna , android checklist, user manager, Webmail, DDMS
- +Technology: Mobile testing
- + Platform: Mobile (IOS, Android).

2011 + SOFT SKILLS

↓
Today

- + Support others on their tasks or when needed.
- + Give the training to new or inexperienced testers.
- + Foresee the risks of project.
- + Analyze business
- + Supervise a group of builds in a project (including the testers assigned to those builds).
- Raise any kind of issue to the PM(during testing process, about working Environment.).
- + Make proposals to improve the testing process/working environment.
