ANDREAS JESCHKE

Network Security Engineer

OBJECTIVE

As an experienced network engineer with a focus on security, I am now looking for projects that can benefit from my expertise in firewall administration and corporate network environments. I currently hold a valid CCNP R&S certification. *References provided on request.*

EXPERIENCE

Network Security Engineer
Royal London Mutual Insurance
Edinburgh, UK (10/2016 - 07/2018)

As member of the network operations team I was responsible for incident response i.e.: Proactive checkouts and monitoring to avoid service outages or limit their impact. Troubleshooting and fault isolation to restore service when necessary. Equally important in my work for Royal London was managing the firewall policy of several firewall clusters, fulfilling service requests created by projects requiring policy changes. In my role I covered the lead network position during several disaster recovery exercises.

KEY SKILLS

Firewall administration
L3 Network Support (Campus & Datacentre)
Proactive Monitoring
