

NGO HUNG PHUC

SENIOR FULLSTACK WEB, MOBILE DEVELOPER, TECHNICAL TRAINER

OBJECTIVE & CAPABILITIES

- * About me: Senior Fullstack Engineer, Game Developer and Front end Technical Trainer
- Currently I'm technical trainer for Angular and React in my company
- Specialized in ASP.Net, ASP.Net Core, MeanJs, Angular, React JS, Automation Test and Mobile
- Keenly embrace new technologies to fit the job description.
- Continually exploring new technologies .
- Good teamwork capabilities and open minded in discussions.
- On time with work schedule
- Good English communication skills.
- Enthusiastic Open source contributor

* OBJECTIVE:

- To challenge myself with new technologies to improve my employment opportunities and career growth potential.

* My open source account:

- + <https://github.com/ngohungphuc>
- + <https://stackoverflow.com/users/11487196/tony-ngo>
- + <https://stackoverflow.com/story/ngohungphuc>

* My blog

- + <https://ngohungphuc.wordpress.com/>

* LinkedIn:

- + <https://www.linkedin.com/in/phuc-ngo-hung-tony-hudson-7b92a0107/>

* English certificate

- Toeic: 770
- IELTS Academic: 6.0

EDUCATION

TON DUC THANG UNIVERSITY

2013 - 2017

Software Engineering

WORK EXPERIENCE

- I have been working in Software industry since 3rd years of my university as fresher and full time at final year of my university
- I have 5 Years experience with Fullstack web development in ASP.Net, ASP.Net Core, Angular, React JS, Redux & NGRX, Webpack
- 1 Year experience mobile development
- Experience working with Web tool & framework: NodeJS, Mean Stack, GraphQL, NGRX

Laravel

Wordpress

Automation Test

- PHP development using Laravel, CI framework, Wordpress

- Architect Design: MicroService, Angular

- Testing framework: Specflow Automation Test

- Devops Skill: Travis, AppVoyer, Azure

* Open Source Contributor at Github (Jan 2016 – Present)

- Develop open source project at <https://github.com/ngohungphuc>

* Publish One (SEP 2018- Present)

- Industry: Product

- Role: Senior Fullstack Engineer

- My Responsibilities: Technical trainer, Technical presentation, Architect design & Architect documentation

* Project i have contributed::

- PublishOne

- PublishOne Xslt Editor

- PublishOne Documentation

* NASH TECH (JUN 2017 - AUG 2018)

- Industry: Outsource

- Role: Fullstack Developer & Automation Tester

* Project i have contributed:

+ BlackCap: Core team member for Social network project

+ Online Training Tool: Online training website for company

+ Adslot Symphony: Symphony is the world's leading buying and planning workflow platform for media agencies. Employed by the largest holding companies on the planet, Symphony manages every step of the media buying life cycle.

* TPF AUSTRALIA (AUG 2016 - MAY 2017)

- Industry: Ecommerce

- Role: Fullstack developer.

* Project I have contributed to:

+ TPF THINK : <http://tpfthink.com.au>

+ SHOP PINK: <https://shoppink.mcgrathfoundation.com.au>

+ Splashlings : <http://splashlings.com>

+ TPF GROUP <http://tpf.com.au>

* KMS TECHNOLOGY (JUN 2016 - JULY 2016)

Refresher training program for .Net developer. Skill and technologies I acquired :

+ ASP.NET MVC 5 : Building website with ASP.Net Mvc framework

+ Coding quality : Write high standard code with enterprise level

+ Rest API

+ Unit test

+ HTML/CSS/JS/AJAX

* KMS TECHNOLOGY (MAY 2015 - DEC 2015)

- Project Description: Building a website based on the customer's requirements

- Industry: Nonprofit

- Project Team Size: 6

- Roles: Handled all the customer's request submissions.

* My Responsibilities:

+ Received client requirements/changes/built request for their website and updated

Version Control

SignalR

Typescript

NodeJS

WCF

Unity

Database Design

SQL

MongoDB

Redis

Mobile

Azure

- specification accordingly.
- + Contacted customer for missing information.
- + Updated the Team Leader with the project progress at the end of each day.

PROJECT

ANGULAR TRAINING

APR 2019 - JULY 2019

Technical trainer

* My Responsibilities:

Training Angular for my company with 15 peoples

* Course materials:

<https://bit.ly/33maeAS>

PUBLISH ONE

SEP 2018 - NOW

Senior Fullstack Engineer

- Team size: 25

* My Responsibilities:

- Angular Architect design & Architect documentation
- Code refactor, optimize code, develop new functionality, code review
- Bug fixes.
- Performance monitoring for Frontend side.
- Develop ticket from start to end
- Provide technical approach and apply for team
- NGRX, NGRX Entity integration from start to end
- Code quality enhancement for Front end
- Integrate service worker
- Integrate sass, webpack
- Angular migration from v5 to v7

* Technologies used in this project:

- + ASP.Net Core 2.x
- + SignalR Core
- + SQL Server
- + Entity Framework
- + Azure function
- + Azure
- + i18n
- + Angular
- + Redux, NGRX, NGRX Entity
- + SASS
- + Kendo UI
- + Service Worker

AWESOME DOTNET CORE

JAN 2018 - NOW

Open source

- Project url: <https://github.com/thangchung/awesome-dotnet-core>

* My Responsibilities:

In my spare time I contribute and do code review to this repo to bring awesomeresource for .Net Developer

CLEAN CODE .NET

JAN 2018 - NOW

Open source

- Project url: <https://github.com/thangchung/clean-code-dotnet>

* My Responsibilities: I contribute to this repo and do code review to assist developer in being more aware of the importance of clean coding in IT industry

ONLINE TRAINING

SEP 2017 - JAN 2018

Open source

* My Responsibilities:

- System design

- Database design

- Handle code refactor, optimize code, code review , develop functionality , apply technology

- Project url : <https://github.com/ngohungphuc/online-training>

* Technologies used in this project:

+ ASP.Net Core 2.0

+ Gzip compression

+ JWT Authentication with refresh token

+ SignalR Core

+ Elasticsearch

+ Entity Framework

+ Automapper

+ MongoDB

+ Webpack

+ Angular 4

+ Redux, NgRx, NgRx Effect

+ SASS

+ Bootstrap materialize design

+ MongoDB

+ DriverGoogle drive API

+ Video streaming

+ Web job background task

+ Deploy to heroku using Docker

AWESOME CMS CORE

JUN 2017 - OCT 2017

Open source

- Project url: <https://github.com/SaiGonSoftware/Awesome-CMS-Core>

- Team size : 1

* My Responsibilities:

- System design

- Database design

- Handle code refactor, optimize code, code review , develop functionality , apply technology

- Writing Automation Test with Specflow

- CI/ CD integration with Travis CI, AppVoyager & Azure

- Setup webpack with Reactjs

- Technology used in this project:

- * Frontend
- + ReactJS
- + Webpack
- + NodeJS

* Backend

- + Gzip compression
- + Redis Cache
- + ASP.NET Core 2.0
- + API Versioning
- + Swagger
- + ElasticSearch
- + SQL Server
- + Entity Framework
- + Automapper
- + Autofac
- + Google Drive API
- + Openiddict
- + Web API
- + SignalR
- + Message Queue (RabbitMQ)
- + WebJob
- + Specflow Automation

CI, CD Tool:

- AppVeyor
- Travis CI
- Azure Devops, Azure

ADSL0T

NOV 2017 - AUG 2018

FullStack developer & Automation Tester

- Team size: 20

* My Responsibilities:

- + Ticket refinement for the team with detail implement breakdown.
- + Code review, code refactor, optimize code.
- + Develop new functionality.
- + Bug fixes
- + Writing Automation Test for tester team.
- + Development with ASP.Net MVC and React & Redux.
- + Writing unit test for frontend and backend.
- + Database design.

* Technology use in this project:

- + ReactJS, Redux, Redux thunk
- + Webpack
- + SQL Server
- + ASP.Net, ASP.Net MVC
- + Web API
- + Entity Framework, Store procedure
- + MassTransit
- + Automapper

+ Specflow Automation

BLACK CAP

JUN 2017 - OCT 2017

FullStack developer

The application itself it a hybrid of linkedin and facebook for students which will onboard high school students and follow them through into university and then finally as alumni. It will track their interests and target them with trending data. Universities will have pages which can advertise themselves and allow them to be ranked in a number of dimensions, Universities will have Departments and organisational units below this level. Students will also have pages which will allow them to post updates on their activities, upload picture and video media for display in personal feeds as well as sharing. It will allow students to join Hubs and Groups which focus on various topics such as clubs or social activities. Students can be ranked and become Ambassadors or Role Models against Hubs or Groups and they can also follow other students, Groups or Hubs. There will also be a big data element to this as student activity is captured allowing for specific offerings from companies who may wish to hire them or activities are suggested. It is expected that the data sets we will be working with will become very large as this is rolled out worldwide. The application will need to be multi-lingual and consideration should be put in to allow universities to be able to add the various language texts without the need of intervention from BlackCap.

- Team size: 30

* My Responsibilities:

- + Make the detailed designs for assigned tasks.
- + Write code based on detailed designs and Functional/Requirement Specifications
- + Incident and bug fixing
- + Implement backend API
- + Integrate API to frontend with Angular 4, Redux, NgRx
- + Code review, code refactor, optimize code.
- + Implement Elasticsearch, WebSocket
- + Development from FrontEnd to BackEnd
- + Database design.
- + Write unit test

* Technologies used in this project:

- + .Net Core 2.0
- + Elasticsearch
- + SQL Server
- + Web Socket
- + Azure
- + Entity Framework
- + Angular 4, Redux, NgRx, NgRx Effect

TPF GROUP

MAY 2017 - JUN 2017

Backend

- Project url: <http://tpf.com.au>

- Team size: 15

* My Responsibilities:

- + Work with Designer team to finalize design and have good UX.
- + Convert PSD to HTML/ CSS/ JS.

- + Build website using wordpress.
- + Build custom template using wordpress.
- + Bug fixes

* Technologies used in this project:

- + Wordpress
- + Bootstrap
- + Responsive Design with GRID system
- + HTML/CSS/JS

Q&A FORUM

DEC 2016 - MAR 2017

Open source

- Project url: <https://github.com/SaiGonSoftware/QA-Forum>
- Team size : 2

- My Responsibilities:

- + Database design
- + Setup project & apply MEAN Stack for project
- + Idea and feature breakdown
- + Integrate with Facebook API
- + Layout design
- + Build API
- + Integrate with Android

- Technologies used in this project:

- + MEAN Stack
- + MongoDB
- + Bootstrap
- + Facebook API
- + Android
- + Java

SPLASHLING

NOV 2016 - DEC 2016

WEB DEVELOPER

- Project url: <http://splashlings.com/>
- Team size: 15

* My Responsibilities:

- + Work with Designer team to finalize design and have good UX.
- + Convert PSD to HTML/ CSS/ JS.
- + Build API for front end side.
- + Refactor and improvement code base.
- + Perform monitor of website using performance checking tool and provide suitable solution for website.
- + Apply responsive design for website include mobile screen
- + Apply caching strategies.
- + Bug fixes

* Technologies used in this project:

- + ASP.Net MVC 5
- + SQL Server
- + XML

- + Frontend responsive design using GRID system
- + HTML/CSS/JS

SHOP PINK

NOV 2016 - DEC 2016

WEB DEVELOPER

- Project url: <https://shoppink.mcgrathfoundation.com.au/>
- Team size: 15

* My Responsibilities:

- + Work with Designer team to finalize design and have good UX.
- + Convert PSD to HTML/ CSS/ JS.
- + Build API for front end side.
- + Refactor and improvement code base.
- + Perform monitor of website using performance checking tool and provide suitable solution for website.
- + Apply responsive design for website include mobile screen
- + Apply caching strategies.
- + Bug fixes

* Technologies used in this project:

- + ASP.Net MVC 5
- + SQL Server
- + XML
- + Frontend responsive design using GRID system
- + Ajax
- + HTML/CSS/JS

TPF THINK

AUG 2016 - DEC 2016

WEB DEVELOPER

- Project url: <http://tpfthink.com.au/>
- Team size: 15

* My Responsibilities:

- + Work with Designer team to finalize design and have good UX.
- + Convert PSD to HTML/ CSS/ JS.
- + Build API for front end side.
- + Refactor and improvement code base.
- + Perform monitor of website using performance checking tool and provide suitable solution for website.
- + Apply responsive design for website include mobile screen
- + Apply caching strategies.
- + Bug fixes

* Technologies used in this project:

- + ASP.Net MVC 5
- + SQL Server
- + XML
- + Frontend responsive design using GRID System
- + Ajax
- + HTML/CSS/JS

FREELANER

JAN 2016 - APR 2016

Open source

- Project url: <https://github.com/SaiGonSoftware/Freelancer>
- Team size: 1

* My Responsibilities:

- + Setup and apply technology
- + Idea and feature breakdown
- + Database design
- + Integrate with Facebook API
- + Layout design

* Technologies used in this project:

- + Laravel php framework
- + Facebook API
- + Bootstrap
- + JS/Jquery/Ajax
- + MySQL
