

CURRICULUM VITAE

PERSONAL DETAIL

- Name Phan Thi Thu Thao
- Nationality Vietnamese
- Gender Female
- Address Da Nang, Viet Nam
- Email Thaophan0209@gmail.com
- Phone number (+84) 779 417 848

OBJECTIVE

I'm a QC Engineer. My career Goals are:

- Short-term goal: Learn and cultivate knowledge about tester. Thence, improve the skills about manual testing and automatic testing.
- Long-term goals: Become a master Tester in software testing. Using my own ability, I can create quality and useful products in life and share knowledge with everyone.

PROFESSIONAL SUMMARY

- 3 years' experience in software testing.
- Experience with full system software development life cycles in Agile model.
- Experience in UI, API, Database and Mobile testing.
- Knowledgeable in different testing levels: Integration Testing, System Testing, Acceptance Testing.
- Knowledgeable in different techniques for writing test cases: Equivalence partitioning, Boundary value analysis, Decision table, state transition, error guessing.
- Having experience in Test Management: create a basic test plan, estimate time for write testcase and execute test.
- Knowledgeable in Database structure and writing query using SQL Server.
- Having knowledge of API testing and Database testing.

TECHNOLOGY AND SOFTWARE DEVELOPMENT SKILLS

Level: 1-4 Aware (Basic, need to practice more); 5-7 Knowledgeable (Intermediate, can use it at work); 8-10 Proficient (Advanced, very good, can teach others)	
Competencies	Level
Jira	Proficient, 8/10
SQL Server, MySQL	Knowledgeable, 6/10

Requirement analysis	Proficient, 8/10
Postman	Knowledgeable, 7/10
Creating testcase, Executing test	Proficient, 8/10
Java (Automation coding)	Aware, 4/10
Selenium	Aware, 3/10

EDUCATION

From: 2013 To: 2017	University of Education - The University of Da Nang Bachelor in Resources and Environmental Management.
2020	FPT Software Academy Software Testing
2021	IELTS 6.5

WORK EXPERIENCE

From: 6/2022 To: now	Company: CMC Global Work as a QC Engineer
From: 1/2021 To: 5/2022	Company: Loan Factory Work as a QC Engineer

PROJECT LIST

PROJECT 1

Client:	US Customer
Project Description:	<ul style="list-style-type: none"> - Domain: Data Analysis - Investigative insights for modern data from Cloud Collaboration Tools and Mobile Device Data. - Developing AI tools like emoji clouds, cross-platform chat threading, audio transcription, facial and object recognition for view, review, and analyze data with optimized visual context, easy access to embedded links, images, and files

	- Integrate Interactive Timelines, Concept Searches, Searchable Word and Emoji clouds, Heat Maps, and more for effectively search and cull large amounts of mobile data.
Responsibilities:	<ul style="list-style-type: none"> - Analyzing the specifications and log QA. - Estimate QA tasks and efforts. - Create, maintain test cases - Executing test, reporting bug - Analyze problems and complete detailed reports. - Track/reports project status for the project lead to ensure the project is done - Support BA and developers about the requirement specification and side effects when implementing new function
Tools	Microsoft Office, Jira, Swagger, Postman, Virtual Machine
Platform, server and database	MySQL, MS SQL Server.
Used technologies:	<ul style="list-style-type: none"> • Integration Testing • System Testing • Boundary Value Analysis • Error Guessing • Exploratory Testing

PROJECT 2

Client:	US customer
Project Description:	<ul style="list-style-type: none"> - Domain: Finance - This application is developed for Mortgage Originators, brokers and borrowers. - The system helps users to shop around dozens of the top wholesale lenders in real time, finding a best rate to apply for a mortgage/loan. - Users are allowed to contacts the nearest mortgage broker and submit all the required documents through the website
Responsibilities:	<ul style="list-style-type: none"> - Analyzing the requirements with the customers, log QA. - Estimate QA tasks and efforts, write Test plan. - Create, maintain test cases - Executing test, reporting bug - Analyze problems and complete detailed reports. - Track/reports project status for the project lead to ensure the project is done
Tools	Microsoft Office, Jira, Swagger, Postman

Platform, server and database	MySQL
Used technologies:	<ul style="list-style-type: none"> • Integration Testing • System Testing • Boundary Value Analysis • Error Guessing • Exploratory Testing • Checklist-based testing.

PROJECT 3

Client:	US Customer
Project Description:	<ul style="list-style-type: none"> - Domain: Finance - Web Application, the application is made for the US wholesale lender. It helps the Loan Underwriters to manage the Loans, release the conditions and validate the Loans.
Responsibilities:	<ul style="list-style-type: none"> - Read, learn requirements and create Test Cases. - Executing test. - Functional testing, system testing. - Log bug in Jira system. - Write test reports. - Analyze problems and complete detailed reports. - Track/reports project status for the project lead to ensure the project is done
Tools	Microsoft Office, Jira, Swagger, Postman
Platform, server and database	MySQL
Used technologies:	<ul style="list-style-type: none"> • Integration Testing • System Testing • Boundary Value Analysis • Error Guessing • Exploratory Testing

PERSONAL INTERESTS

- Singing and travelling, exploring new things.
- Cooking is also my jam.
