(for communication between
Android game & company's
platform).

Including: Google &
Facebook login, GCM,
GoogleAnalytics, AppsFlyer
& InApp Billing.

Software documentation

bitbucket.org/RuslanAliyev/playsdkbasic_doc

Update an old Android SDK
(for communication between
Android game & company's
platform).

Including: Localization,
google services 8+,
Facebook v11.0.0.11.23+,
Webview email,
Webview file upload in
Android 4 & 5, Webview
cookies & Facebook share.

Software documentation

bitbucket.org/RuslanAliyev/playsdk2doc

Create PHP eCommerce
modules.

These modules are PHP
classes which encapsulate
other eCommerce
companies' payment API.

These eCommerce
companies are: [MOL](#),
[GamesBerry](#) & [UniPin](#),
which are international
companies based in South
Asia.

Create 4 HTML5 games.
Create.js, Construct 2,
Live2D game frameworks for
FrontEnd.

PHP and MySQL Backend.
Connected to Google, FB,
etc. Maintain user stats.
Have payment abilities.

Educational Game - create.js

h.coolplay.com/Introduction/129

Basketball Game - create.js -

h.coolplay.com/Introduction/126

Combat Game - Construct2 - www.51h5.com/game-index-id-1883.html

Fashion Game - Live2D - rescu-witch.1717yo.com

Customize ~80 HTML5
games.

Company obtained generic
H5 games, which need to be
customized
in order to interact with
company's platform

h.coolplay.com
