## Summary

Throughout my career, I've proved that I'm a quick learning, self-motivated person, and well collaborating with others to get the work done.

## Experiences

### Senior Software Engineer

Nov 2015 - Present

#### At Lazada Group

- Being back a team member on a self-motivated team, with less responsibility but massive knowledge to be obtained. Something like ElasticSearch, Aerospike for faster retrieval from Front\_End. RabbitMQ for queuing jobs.
- Since it's a self-motivated team, I am also responsible for deploying the work to staging, live, monitoring memory usage of the job, by using other team's projects on monitoring staging, live resources.

### Team Lead

Jan 2014 - Nov 2015

#### At Sunrise Software Solution (S3)

- This is where I break through from being a team member to team leader.
- Self motivated and motivating team to work with flexibility to change priorities but still meeting deadlines.
- Frequently communicate with requirements team on Singapore and always have flexibility to adapt some new requirements (sometime new requirements are reject or delay till next release)

## Senior PHP Developer

Jan 2013 - Jan 2014

### At VNG Corporation

- Continuing on proving the quick learning ability, by quickly learn about to how use and customize OpenX server, PHP web server for managing Advertisements.
- Collaborate with other Zing's team to make use of the cookies, APIs, which are used on customizing the Ads control in OpenX

## PHP Web Developer

Apr 2009 - Jan 2013

### At Rapture

- Adaptive and quick learning all the necessary knowledge to start new programming language (I changed from Java to PHP)
- Constantly learning new technology to work with various projects, like facebook login, credit card verification, single sign on.

## Java Developer

Dec 2007 - Apr 2009

### At Elisoft

- Collaborating with other team members, both from main site (US site) and branch site (outsourcing site in Vietnam) to solve customer's problem.
- Frequently communicating with customers about their issues, to get the exact replicate environment which issue occurs in.
- Reliable and self-motivated, not once got complain from customer.

## Skills

- |   |  |
|---|--|
| <ul style="list-style-type: none"><li>- Golang, PHP, Java, Javascript, Shellscript</li><li>- Yii, CakePHP, Symfony</li><li>- MySQL, PostgreSQL</li><li>- Redis, Memcache, Aerospike</li></ul> | <ul style="list-style-type: none"><li>- Nginx, Apache</li><li>- ElastiSearch</li><li>- Subversion, git</li><li>- Linux</li></ul> |

# Educations

Bachelor of Computer Science and Software Engineering (not finished) 2003 - 2006

At Swinburne Uni

- Learning how to program with Java, and what Design Patterns there are and when to use them. Some of them are Singleton (for not repeatedly generate Objects), MVC (for decoupling the system and easier to maintain or replace some parts), Service Factory (for centralized all the generating services in One place), etc..
- Learn about Software Life Cycle, what need to do to build a product (brainstorming requirements, build prototypes, collecting feedback, start to build a product based on all of those requirements and feedback)

Certificate IV of Information Technology and MultiMedia 2002-2003

At Swinburne TAFE

- First touch to programming, start with Visual Basic
- Learn about Network Layer, data transmission.
