## Attended projects

---

### Domestic Tour (07/2019 - Now) - Hybrid Technologies Vietnam

Description	Domestic tour system is a system that put together tour packages (include air ticket and hotel) and sell them to domestic travelers. Website: <a href="https://domdp.airtrip.jp/">https://domdp.airtrip.jp/</a>
Type	Web application
My position	Java Developer
My responsibilities	Investigation Bugs fixing Implementing new feature Deploy to server and tested them
Technologies used	Spring Boot, Java8, RESTful API Python Pyramid, Jinja2 template BackboneJS, UnderscoreJS Jquery ajax Redis MySQL, Oracle

### Youchoshindan (03/2019 - 05/2019) - Fujinet System JSC

Description	Youchoshindan is a system that displays the sound diagnostic results graph of an IoT system
Type	Web application
My position	Developer
My responsibilities	Investigation Implementing new feature and testing Create UnitTest, CombineTest.
Technologies used	Dot Net core 2.1 Jquery ajax SQLite

### Shineiyou (12/2018 - 02/2019) - Fujinet System JSC

Description	Shineiyou is a batch system used to compare data between the old system and the new system running on the linux environment
Type	Batch
My position	Java Developer
My responsibilities	Investigation Implementing new feature and testing Create UnitTest, CombineTest.
Technologies used	Java core Oracle

### Effuko (03/2018 - 12/2018) - Fujinet System JSC

Description	Effuko is a temperature information management system of LNG systems factory. It is used to process the temperature information entered by users and process report output
Type	Web application
My position	Java Developer
My responsibilities	Investigation Implementing new feature and testing Create UnitTest, CombineTest.
Technologies used	Ifit Framework, Java Oracle
