EXPERIENCE

Project Manager

December 2019 - Now

Pobble | Ho Chi Minh, Viet Nam

- Create the Master plan for product, define project scope, goals and releasable that fit to the business goals
- Work with Teams (Server, Mobile, AI) to build up the product
- Track project milestones and deliverables.
- Research on market for product's output: How to compete with other competitors, how to make a special application with a huge DAU
- Discuss to CEO and find out the strategy for product launch
- Present application demo to investors for attracting investment
- Using github to manage teams and Wiki for official documents

Docosan | Ho Chi Minh, Viet Nam

September 2019 - Now

(Working as supporter)

- Docosan is a start-up company of 3 Co-Founders (2 Americans and a Vietnamese doctor), they are from Harvard and would like to build a health care product for doctors, clinics and patients to use for booking appointments
- I help them to build up the company in Tech part and also contribute on Product orientation for the company
- I support Docosan to build teams and manage the plan by using Trello
- Integrate some google services (Google api, Analytic, Google database)
- Create some documents for Co-Founders (Schedule plan, Database security)

Senior Consultant

September 2017 - December 2019

V-Key | Ho Chi Minh, Viet Nam

- Leading and Technical support for Team to upgrade, and maintain advanced banking security industry software (OTP, PKI, EKYC).
- Design Pattern for code: MVP and MVVM. Manage and Configure FCM/APNS / ASP cert/SMP cert/ Keystore, build and release application on Google Play and Apple Store
- Coordinate the design and implementation of various applications, including collaboration with QA Product Owner, and client representative and development teams.
- Provide mentoring services to junior developers as needed.
- Work on Microsoft office services (federate domain, configure tenants, SALM)
- Coding on mobile platform once project has a lot of priority tasks

Senior Software Engineer

Apr 2016 - Aug 2017

Hanbiro | Ho Chi Minh, Viet Nam

- Create the document and flow of the application then discuss it with the Product Manager.
- Design database infrastructure then back to the team and integrate data into it.
- Experimented with multiple iterations during design implementation. Wrote extensible and maintainable code as part of a team.
- Code hybrid application (WebView and Native java)

- Protect source code by obfuscating source with Proguard, URL Schema to open app parallel with QR Code reading Release and Manage application on Google play, App Store.
- Get requirement from client in Korea then rebuild application

Senior Software Engineer

May 2014 - Apr 2016

FPT | Ho Chi Minh, Viet Nam

- Separate requirements from customers in Japan then make the timeline using Jira.
- Manage tasks and keep it on time to release new version or demo for team
- Team work for fixing hot bugs and give idea, logical to resolve technical issues once face it
- Coding as mobile developer for some features and implement library from company's core source code
- Estimate man-day for task then report to managers.

Communicator and Developer

Feb 2012 - Mar 2014

Gameloft and Freelancer | Da Nang, Viet Nam

- Bid projects then negotiate with customer to get requirements clearly and back to team (4 members)
- Create timeline and make deal budget with customer
- Update status, coding and fix bug if have any then report the progress to customer
- As for the Gameloft company, I have worked in a Java Game position. Coding and integrate library, framework to fix bugs and improve game onto multiple devices
